

Herries Range Wind Farm

Community Information Session

Who is Acciona Energia?

ACCIONA Energia is a major player in the renewable energy market, with a strong presence in over 20 countries. The company works exclusively with renewable technologies; specifically — wind, solar PV, solar thermal, hydro and biomass. We have been developing renewable energy projects in Australia since 2002 and currently have projects in New South Wales, Victoria, South Australia and Queensland.

Proposed Herries Range Wind Farm

The Project is proposed for a site located near Karara, approximately 50 kms west of Warwick. The Project boundary lies within three Local Government Areas – Southern Downs, Goondiwindi and Toowoomba. The Project is near to the MacIntyre and Karara Wind Farm projects.

At this stage, the Project encompasses an area of approximately 26,000 ha of privately owned freehold properties. It is anticipated that the Project will include approximately 180 wind turbine generators (WTG), with a maximum tip height of up to 240.5m.

The project will transmit energy through the 330 kV overhead transmission line (OHTL) being constructed as part of the adjacent MacIntyre Wind Farm precinct, to the existing Tummalville switching station.
